

American Samoa crimson energy storage project

What is the Crimson solar project?

"The Crimson Solar project is one of the largest standalone battery energy storage projects on BLM-managed lands and showcases the agency's commitment to meeting the Nation's energy and economic needs with 21st Century technology." The Crimson Energy Storage Project created 140 union jobs during peak construction.

How much land does Crimson storage use?

The entire project, including the storage and the solar facility, will include about 2,000 acres of land administered by the BLM. According to Recurrent Energy, Crimson Storage is the first standalone energy storage project that gained approval to site on BLM lands under the Biden Administration.

What is Crimson energy storage?

The Crimson Energy Storage project epitomizes California leadership- clean energy, innovation, and economic development through good union jobs. We've been laser focused on quickly bringing projects like this online to achieve our goal of a 100% clean energy grid.

When did Recurrent Energy start developing Crimson storage?

Recurrent Energy began developing Crimson Storage and our larger energy storage pipeline in 2015 when no large-scale storage projects yet existed. Last year, we started bringing these projects to fruition also thanks to our CSI Energy Storage team.

What is crimson storage?

Crimson Storage is also the second-largest energy storage project currently in operation of any configuration. The 350 megawatt (MW)/1400 megawatt-hour (MWh) battery storage project, which sits on 2,000 acres west of Blythe in Riverside County, broke ground in 2021.

Who owns Crimson storage?

In September 2021, Recurrent Energy, which is a wholly-owned subsidiary of Canadian Solar, sold an 80% stake in the energy storage project to Axium Infrastructure (Axium). Recurrent Energy retained 20% ownership in the facility. Crimson Storage is developed on public lands about 13 miles west of Blythe, in Riverside County, California.

Canadian Solar subsidiary Recurrent Energy has signed a 15-year resource adequacy agreement to provide 150MW/600MWh of energy storage in Phase II of the Crimson energy project. The agreement was signed ...

Crimson Storage is a 350 MW / 1400 MWh standalone energy storage project located in Riverside County, California, the US. The facility is a part of the larger Crimson Solar Project, which will be constructed in future.

American Samoa crimson energy storage project

The battery storage project will provide 1400 megawatt-hours of electricity at full capacity and is a significant milestone in the Biden-Harris administration's efforts to modernize America's power infrastructure in the West and achieve a goal of 100 percent carbon-free electricity by 2035.

Canadian Solar subsidiary Recurrent Energy has signed a 15-year resource adequacy agreement to provide 150MW/600MWh of energy storage in Phase II of the Crimson energy project. The agreement was signed with the Pacific Gas and Electric Company (PG& E), an investor-owned utility based in the US.

The company has commercialized 2.9 GWh of energy storage projects that are in construction or operation, including Slate Solar + Storage, and has an additional pipeline of 15 GWh of...
