

Angola solar fast

Will a 150 MW solar plant help Angola?

An agreement for the development of a 150 MW solar plant was signed between Angola's Ministry of Energy and Water and UAE-based renewable energy company Masdar in Dubai last December. The 150 MW project will produce electricity to power 90,000 homes, contributing to job creation, emissions reduction and efforts to increase national electrification.

Will Angola's solar energy project be a better future?

"Today's groundbreaking in Angola of a US-backed initiative that will be the largest solar energy project in sub-Saharan Africa demonstrates the progress being made. The result will be a better, more prosperous future for the people of Angola."

How many MW of solar energy will be installed in Angola?

Under the agreement, Sun Africa will develop 728 MW of solar mini-grids to provide electricity to more than 2 million people in southern Angola. The investment represents the largest mini-grid energy project in Africa.

Who is tasked with the construction of the Angola solar energy project?

Clean energy firm MCA Group has been tasked with the construction of the projects. An agreement for the provision of \$900 million in funding to support the implementation of the Angola Solar Energy Project was reached between Angola's Ministry of Energy and Water and the U.S. Export-Import Bank in June 2023.

When did Angola start a solar project?

A final investment decision for the project was reached in December 2021. Angola started operations at two solar energy facilities - the 188 MW Biopio Solar Plant and the 96 MW Baia Farta Solar Plant - in Benguela province in August 2022.

Why did Angola choose Sun Africa?

When Angola wanted to strengthen their national electricity system, diversify their energy matrix, and reduce their dependence on fossil fuels, they turned to Sun Africa. The result is the Angola Solar Project, the largest renewable energy project in Sub-Saharan Africa.
