

In 2019 Comet Solar installed an 8-kW rooftop solar PV plant in Island Harbour, Anguilla. By installing a Sonnen storage system and using Solar-Log's control technology, the plant owner is able to make use of the solar power produced while limiting the amount of power exported to the grid.

A solar electrical provided and installed from Boissonneault Electric Corp. saves you the expense of commercial electric rates increasing 20% to 30% per year with no end in sight. A solar electrical system lets you offset those increases and even reduce, or eliminate, your electric costs. A Commercial Solar Electrical System can:

To ensure sustainability of the Project, the contractor's scope of works includes training for ANGLEC staff to help them develop the skills required to maintain and operate the solar PV plant. The power plant will be designed, operated and maintained to guarantee at least 20 years of operation, within the design parameters.

How Much Do Solar Contractors Charge? Solar power contractor costs are going to depend a lot on what kind of system you are installing, your energy needs, and even labor costs in your area. On average, solar roof contractors and other installers charge \$20,490 for the typical solar panel installation. This cost factors in tax credits from the federal government.

The solar PV plant is CDB's sixth intervention in the energy sector in Anguilla, and supports the Government of Anguilla's goal of transforming the country into a low carbon economy. The country has set a national target of producing 30 percent of its electricity from renewable sources by 2030 and cutting greenhouse gas emissions.
