

# Are solar power generation companies state-owned enterprises

Are Chinese energy companies private or state-owned?

Most Chinese energy companies are state-owned enterprises (SOEs) that receive guidance from the government. Private companies are increasingly active, but their shares in overseas markets are still small. Most Chinese SOEs provide integrated services centred on turnkey project delivery.

Are China's power generation companies accelerating renewable capacity expansion?

China's power generation companies have carried out a phenomenal renewable capacity expansion in the past 2019 and 2020. China's renewable developers--most of which are state-owned companies--rushed to connect their projects in the pipeline, as subsidy sunset for most renewable projects from 2021 onward.

How has China shifted its state-run energy companies to renewables?

China has also shifted its biggest state-run energy companies toward renewables. In 2017, it formed China Energy Investment Corp. by merging two state-owned giants. The company has close to 40 gigawatts of renewable power generation capacity, according to BloombergNEF, more than any of the European and American majors.

Are Chinese companies deploying solar technology across emerging markets?

This study has examined China's overseas solar deployment activities and the implications for technology transfer in this sector. We find that Chinese companies are deploying solar technology across emerging and developed markets by exporting solar technology, building solar manufacturing bases, and establishing local service industries.

Why is China a major energy provider?

China has become a major provider of capital, construction services, and equipment to the energy sectors of developing and emerging economies. Chinese energy and energy infrastructure companies, largely state-owned, are active across the energy sector in most fuels and through diverse modes.

Who owns solar power in South Australia?

Among the top players in the state is Iberdrola, which earlier this year bought Infigen Energy and now operates over 800 megawatts of solar, wind and battery in the country, with 453 megawatts more under construction. Enel operates two solar farms in South Australia, with a combined capacity of 275 megawatts.
