

Aruba energy very endure

Where does Aruba get its electricity from?

Aruba currently gets 15.4% of its electricity from renewable sources. The island has sufficient renewable energy resource potential, with excellent technical potential for ocean, wind, and solar renewable energy generation.

How much energy does Aruba consume annually?

Aruba has an annual consumption of 990 gigawatt-hours (GWh). Currently, about 13% of its generation comes from a 30-MW wind project and 0.9% comes from waste-to-energy (WTE) biogas. An additional renewable capacity of 34 MW is planned or in progress. Aruba's installed generation capacity is 230 megawatts (MW) with an average load of 100 MW.

Can Aruba achieve energy independence?

The country took bold steps toward achieving energy independence and backed up its ambitious talk with real, solid objectives. Aruba isn't just talking about becoming self-sustaining when it comes to power -- it is working to establish the grid and infrastructure that will enable its energy independence by 2020.

What is the cost of electricity in Aruba?

The energy landscape of Aruba, an autonomous member of the Kingdom of the Netherlands located off the coast of Venezuela, is outlined in this profile. Aruba's utility rates are approximately \$0.28 per kilowatt-hour (kWh) (below the Caribbean regional average of \$0.33/kWh).

What is stored-up energy and how does it benefit Aruba?

Stored-up energy grants the flexibility necessary to sustain Aruba in its energy independence. The island has enhanced its storage abilities by utilizing BYD's grid-scale technology, which means that there doesn't have to be a daily breeze in order for Aruba to have ample energy to sustain itself.
