Australia exagrid backup storage

What is ExaGrid tiered backup storage?

ExaGrid has the only non-network-facingtiered backup storage solution with delayed deletes and immutable deduplication objects. This unique approach ensures when a ransomware attack occurs,data can be easily recovered or VMs booted from the ExaGrid Tiered Backup Storage system.

Why is ExaGrid the leader in backup storage?

Learn why ExaGrid is the leader in backup storage. ExaGrid provides tiered backup storagewith a unique disk-cache Landing Zone,long-term retention repository,and scale-out architecture. ExaGrid has the only non-network-facing tiered backup storage solution with delayed deletes and immutable deduplication objects.

Is ExaGrid a good backup solution?

ExaGrid's EX scale-out storage solution is a great choicefor enterprises faced with ever-shrinking backup windows and rapidly increasing capacity demands. It's simple to deploy,hugely scalable and our tests show it offers a high deduplication efficiency while ExaGrid's landing zone delivers fast restores from the latest backups.

Where is backup data stored in ExaGrid?

Backup data is kept in the ExaGrid internal storageon an industry-standard logging filesystem where file activity is logged for integrity and quick repair after an unclean shutdown.

Does ExaGrid support backup applications scale-out?

ExaGrid is integrated with backup applications scale-out functionalitythat allow backup applications to write to any ExaGrid appliance that is not still processing data allowing all appliances to be utilized for performance.

Does ExaGrid retain backup data after a ransomware attack?

ExaGrid has all previous backups before the ransomware attack that can be restored immediately. In addition to being able to recover from the most recent deduplicated backup, the system still retains all the backup dataaccording to the retention requirements. Note: see ExaGrid's Retention Time-Lock data sheet for more detailed information.
