

Loading of lithium batteries into collection containers is carried out by the partner in accordance with safety instructions provided by POWER BATTERY company. These instructions serve as ...

A lithium cell is a single unit and a battery or battery pack is a collection of cells. We'll be covering cells with a maximum rating of 20 Wh and batteries with a maximum rating of 100 Wh. Do I ...

Today, players in the electric vehicle industry are working on optimizing battery packs designs. With our versatile TECPACK solutions, we offer a wide range of material options for kinds of designs, enabling most Li-ion battery packaging designs involving cylindrical, pouch or square automotive battery types.

The ORBIS IonPak® is UN certified to transport solid dangerous goods (e.g. UN3480) and consists of a standard container with customised interior packaging. Due to the special ...

Working with CHEP minimises your cost and risk through our class-leading UN certified standard reusable containers and customized inserts, supply chain visibility and optimization expertise. So you can move more batteries, more safely, with less waste and for less overall cost.

* Lithium battery shipments exceeding 35kg need special transport arrangements. Please reach out to your Account Executive or our Customer Support team for details. Economy services by road (Intra-Europe only)

From the initial stages of packaging battery cells and modules prior to assembly, to the intricate packaging of battery packs and systems, as well as harnesses and electronic components, Corplex ensures precision and reliability at every step.

The ORBIS IonPak® is UN certified to transport solid dangerous goods (e.g. UN3480) and consists of a standard container with customised interior packaging. Due to the special manufacturing process, our lithium battery shipping boxes are extremely robust and durable. We use recycled plastics during manufacturing, leading to CO2 emissions savings.
