

Battery skid Western Sahara

It may be hard to tell what the Cross member tab is used for. I will explain. On the Motobilt MB1503 4 Link Skid Sytem we mounted the transmission to a tube cross member and not the steel skid plate. We did this so the skid plate could be removed without supporting the transmission and transfer case. We used 4 of t

Manual Skid Lifter Highlights: Available in 2,500 or 3,000 lb. capacity; Unmatched maneuverability; Maximum stability even when fully raised; 32" raised height; 30 strokes for loads under 600 lbs; 60-70 strokes for heavier loads; Battery ...

The skid and main sections of the link mounts are 1/4" steel. The lower link mounts were designed with 1.25" x 1" rod ends with 1" x 3/4" high misalignment spacers. The mounting width of the lower link boxes are 2.63 wide.

The skid plate is manufactured from 1/8" steel with CNC press brake bends for added strength. The skid features six (6) drainage weep holes, as well as, countersunk mounting holes for a ...

Our kit includes a new heavy duty removable transmission cross member that replaces your factory cross member, a removable heavy duty 1/8" thick high grade steel skid plate that follows the contours of the transmission cross member, a new rear frame cross member which also acts as a skid mounting system and is an integral structural member to ...
