

Where is the solar power plant located in Benin?

The government of Benin is inaugurating the Illoulofin photovoltaic solar power plant. The facility, located in the commune of Pobè, Plateau department, has a capacity of 25 MWp. Benin is inaugurating its first large-scale solar photovoltaic power plant. The installation, located in the locality of Illoulofin, was recently commissioned.

What type of energy is used in Benin?

The evolution of the electrical mix of Benin indicates that, in 2020, natural gas was the first form of energy used to produce electrical energy, representing a proportion of 71.63%. Solar photovoltaic (PV) accounts for 0.30% of the mix by form of energy compared with 1.36% in 2016, as shown in Fig. 3.

How can bioenergy contribute to the energy sector in Benin?

In addition, the Vossa hydroelectric power plant of 60.2 MW is to be built with an annual production capacity of 188.2 GWh. An additional hydroelectric plant is planned to be installed in Bèrèrou to increase the national electricity production in Benin. Bioenergy can also play a crucial role in the energy sector in Benin.

Does Benin have wind power?

Wind power is one of the RE resources that exist in Benin. The wind potential in Benin is evaluated by the Agency for Safe Navigation in Air (ASECNA) and it shows that only coastal regions have substantial potential and consistent wind speeds throughout the year.

Does Benin have a green energy potential?

Benin has also joined this dynamic by considerably increasing its green energy production efforts in recent years. The country has a huge undeveloped renewable-energy (RE) potential that can contribute considerably to its national energy production capacity. This paper summarizes the current RE situation in Benin and examines its future prospects.

How affordable is electricity in Benin?

In 2019, in terms of the affordability of electricity for consumers, Benin obtained a score of 81 out of 100 compared with the average value, which is 77.25 out of 100. The government of Benin plans to continue its efforts to make electricity accessible to the population and ensure energy self-sufficiency.

Museo Aero Solar, initiated in 2007, is an open and growing collection of community-built Floating Museums from around the world. Reused plastic bags are cut, pasted and joined together to create canvases on which personal stories are drawn and written. They are an open invitation for everyone to reduce, reuse and recycle, turning a notorious ...
