

# British Indian Ocean Territory shakti solar

How does Shakti solar work?

The Shakti Solar provides water to remote locations by converting high voltage, direct current from a solar array into alternating current to run a shakti AC motor. When solar power is not available, the controller can manual switch to an alternate three or single-phase AC input such as a grid or generator or inverter from battery, if available.

Who is Shakti solar pump?

With a leading position in solar pump markets in India, Shakti exports a wide range of pumping products to over 100 countries globally. With a humble beginning way back in 1982, we had worked hard to get where we are today and have had embraced every opportunity that has come in our way.

What is a Shakti solar controller?

The Shakti Solar controller is a variable speed motor drive designed to run a Shakti three-phase AC motor. The Shakti Solar provides water to remote locations by converting high voltage, direct current from a solar array into alternating current to run a shakti AC motor.

Who is Shakti?

Shakti being one of the pioneers in manufacturing of energy efficient pumps and motors with its latest series of new advanced solar energy operated pumps has emerged as a prestigious brand in domestic and international markets.

What is a Shakti Solar Drive?

The Shakti Solar drive is designed with the high standard of reliability expected of Shakti products. The controller attempts to drive the pump and motor to deliver water even under adverse conditions, reducing output as necessary to protect the system components from damage, and only shutting down in extreme cases.

Are Shakti submersible pumps energy efficient?

Manufacturing facilities with an installed capacity of 1 million pumps per annum. Shakti is among the few pioneers in the world to produce 100% stainless steel submersible pumps and motors. Considering energy efficiency features of our pumps, Bureau of Energy Efficiency (BEE) has granted us 5-star ratings to more than 260 of our pump models.

Shakti is among the few pioneers in the world to produce 100% stainless steel submersible pumps and motors. Today Shakti is rubbing its shoulders with best brands in the world thanks to the state-of-the art technology and innovation as its hallmarks.

India has been promoting solar thermal systems, especially in low and medium temperature ranges, through a few initiatives supported by national as well as bilateral/multilateral programmes.

Multiple Applications Run from Solar. Runs various agrarian applications from solar such as pump, thresher, chaff cutter, atta chakki etc. Supports a variety of Solar Motor Pump Sets. It can support variety of motor like Induction, PMSM, S4RM etc and a variety of Pumps like Surface, Submersible, helical etc. Remote Monitoring & Control
