

British Virgin Islands ways to store energy from solar panels

BVIEC is developing a renewable energy strategy based on wind and solar energy in order to be less dependent on fossil fueled power generation in the future. The challenge is that the renewable energy sources have to feed into relative small grids.

Construction has started on a solar plus storage project on the island of Anegada in the British Virgin Islands for a November 2023 commissioning date. # Electricity # Technology # Infrastructure # Strategy # AKU-BAT # storage

The system will comprise of one MegaWatt of solar PV panels and 4,078 kilowatt-hours of battery energy storage. The government said this project is expected to be completed during the third quarter of 2021 and is projected to reduce Anegada's dependence on fossil fuels by 95 percent.
