### Can Brunei be a solar power hub?

Brunei has floating solar potential of ~2.3 GW which presents an opportunity both for use in the electricity grid as well as for green hydrogen production. Adding 500MW of this potential to the grid would lead to increase in Solar PV penetration to 30%.

### How much solar power does Brunei have?

They are designed with large rotor blades and higher hub heights (>100m) to capture larger amount of energy at same rated power. Brunei's current installed Solar capacity is 4.63MW, with 60MW additional planned by 2024 and a target to reach 300MW by 2035.

### Is distributed solar a viable alternative to public transport in Brunei?

Net Zero emissions targeted by 2050 Share of privately owned cars in Brunei's 92% transportation ecosystem with very limited uptake of public transport. Given land constraints in Brunei, distributed solar could be an effective way to increase the country's Solar PV capacity.

### Is oil refining a good investment for Brunei?

Brunei's Oil Refining industry offers an opportunity for domestic demand of Green H2. Using projected Oil Production, demand for H2 in Oil Refining is estimated at ~0.03 Mtpa in 2035. By 2035, Brunei could have ~30% of solar PV penetration in the grid.

## Can Brunei change from natural gas to hydrogen?

"The country can also opt to change from natural gas production to hydrogen," he said. The Japanese energy expert also said Brunei has the potential to benefit from its association with Japan, Australia, and other countries by fostering collaboration for the transfer and assistance of green technology.

### Can floating solar power Brunei?

Besides reducing emissions from the electricity sector which is largely Natural Gas-based and contributes to most of Brunei's total emissions, use of floating solar to power the gridwould also free up Natural Gas for exports, unlocking much more value than using the gas to produce subsidized electricity.

Explore Brunei Energy Services and Trading's activity archive, a testament to our commitment to industry advancement. From conferences to workshops, each gathering underscores our dedication to driving innovation in the oil and gas sector. Join us in shaping the future of energy.

The name of the new entity is PTAS Aker Solutions Sdn Bhd. The joint venture will ensure continuity of delivery to BSP and has a strong local execution capability, combined with the full value of Aker Solutions" international expertise. The work will be managed from PTAS Aker Solutions Sdn Bhd"s office in Kuala Belait, Brunei Darussalam.
