

Can individuals install photovoltaic panels Is it legal

Are solar panels legal?

However, it's crucial to understand that while installing solar panels is legal, certain conditions must be met. For most domestic properties, solar panel installations are considered a "permitted development" and do not require planning permission, provided they respect certain size criteria.

Do I need permission to install solar panels?

Nevertheless, if your building is listed or located in a conservation area, you will need to seek specific permissions. It's paramount that any solar panel installation is carried out by the Microgeneration Certification Scheme (MCS).

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Are solar panels legal in the UK?

All electrical work in the UK must comply with the national standard, BS 7671. Therefore, it's not just about the legality but also the safety and reliability of your solar panel system. While the Feed-in Tariff (FIT) scheme has concluded for new applicants, those already part of it continue to benefit from the incentive.

Do rooftop solar installations need planning permission?

Rooftop solar installations always need building regulations approval, but rarely require planning permission. This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission.

Should you invest in solar panels in the UK?

To make solar panels more affordable for everyone in the UK, the government has set up incentives like solar panel grants. Even so, investing in solar panels can still be a considerable investment which some are not prepared to make. So what else is there to do? Build it yourself of course.
