

# Cellcube energy storage systems Timor-Leste

Who is cellcube energy storage system?

Correct, CellCube Energy Storage System Inc. is a vertically integrated energy storage system provider. We are in the process of setting up the vanadium mine to produce all-vanadium electrolyte for the use in CELLCUBE flow batteries, exclusively.

Who is cellcube?

CellCube intends to be a fully integrated producer of vanadium, vanadium electrolytes and vanadium redox flow batteries for the Energy Storage Market. We put 15 years of research and development into the CellCube to provide you with a top-notch energy storage system.

What is the stock symbol for cellcube energy storage systems?

CellCube Energy Storage Systems Inc. Stock Symbol CSE (CUBE) OTCQB (CECBF) Frankfurt (01X)  
Recent Price: \$0.19 Market Capitalization: \$26 million

Where can I find cell Cube energy storage?

65 Queen St West, Suite 520 Toronto, Ont. M5H 2M5, Canada 1-800-882-3213  
info@cellcubeenergystorage.com CSE: CUBE 12g3-2(b): 82-2062 OTCQB: CECBF Frankfurt: 01X

Why should you choose a cellcube?

Based on the vanadium redox flow technology, the CellCube allows for a clean, emission-free and fast energy supply at all times. A stable power supply, in combination with renewable energy sources, is ensured at all times and in every climate zone. The use of vanadium electrolytes increases the safety and battery life.

What is a cellcube used for?

With its simple and independent scalability in power output and storage capacity, the CellCube is already over 130 units in operation for individual industrial applications, to even out load peaks, for e-mobility solutions, for off-grid applications and for microgrid power supply in regions without a stable power grid.

CellCube launched its new generation of products, the FB250 (see image above) and FB500. The new energy storage systems achieve new standards in performance and flexibility in terms of power rating, efficiency, cycling, and lifetime.

With these units now we have a full vertical integration to deliver these turnkey energy storage systems. We have everything - we have the flow batteries; under Gildemeister we always integrated the inverter technology and the PCS into it.

The plan includes standalone plants or storage facilities collocated with solar photovoltaic (PV) systems to

offer power market traded energy and ancillary services products, CellCube said on Wednesday.

The company manufactures modular VRFB battery energy storage systems (BESS), with its three pre-configured systems offering four, six and eight-hour duration in 250kW stages. Its system can also be configured to provide a duration of up to 24 hours.
