

Chilicon power Afghanistan

In a significant development within the renewable energy sector, Generac, a leading provider of backup power solutions, has recently acquired Chilicon Power, a prominent microinverter manufacturer. This strategic move not only strengthens Generac's position in the solar industry but also reflects its commitment to expanding its product ...

Chilicon inverters have been designed ground-up to provide reliability, efficiency, and lean construction to provide customers with the best possible inverter solution for their power generation project.

Generac is to acquire Chilicon Power, a US-based microinverter and solar monitoring solutions provider, in a deal which will see the company take aim at the solar microinverter market.

????????????????????EMA????????????

Chilicon's power inversion and monitoring system technology maximizes PV system production, lowers installer operational cost, and promotes end-user satisfaction. ? Our Microinverters and Gateway are designed and manufactured in California. ?

C hilicon Power CP-250E inverter performance leads the industry with sustained power production of 289 watts AC which provides well scaled output power compatibility for 60-cell and 72-cell modules up to 350W DC STC. The CP-250E has extended input voltage range and supports 72-cell (CP-250E) modules.

Chilicon Power???2010?,????????????,????????????MLPE???????????? ???? ...

Chilicon Power manufactures microinverters for 60/72/96 cell PV modules (CP-720) and complete energy generation and control systems for residences and commercial buildings. The GATEWAY is a monitoring system communicating with the inverters in your array that can be cloud interconnected or can run stand-alone.
