

# China battery companies europe

Why are Chinese battery companies flocking to Europe's electric vehicle market?

Chinese battery companies are flocking to Europe's booming electric vehicle (EV) market to profit from the European Union's (EU) ambitious goal to ban all fossil fuel cars by 2035. This year, Chinese companies have raised more money through share sales in Europe than in the U.S. for the first time.

Will China build a battery factory in Hungary?

Since 2018, Chinese battery firms have announced investments in Europe worth \$17.5 billion, including plans by Contemporary Amperex Technology Company Limited, or CATL, to build a factory in Hungary that would be the largest of its kind in Europe.

Where are battery makers from China based?

The Chinese battery maker CATL's plant in Arnstadt, Germany, in January. Paul-Philipp Braun/CATL, via Reuters Battery makers from China are rapidly expanding in Europe, responding to a growing market for electric vehicles while bucking an overall contraction in Chinese investment on the continent.

Will Chinese companies be able to develop batteries in Europe?

New criteria requiring Chinese businesses to have factories in Europe and share technological knowhow will be introduced when Brussels invites bids for EUR1bn of grants to develop batteries in December, according to two senior EU officials. The pilot could be rolled out to other EU subsidy schemes, they said.

Are Chinese batteries coming to the UK?

The UK is eighth with just 20GWh. In addition to battery production that has already been announced, a slew of Chinese brands, from BYD to Great Wall and Nio, plan significant sales growth in Europe. This will, in time, mean vehicle assembly and even more battery plants that are also likely to use Chinese technology.

Why are battery makers focusing on Europe instead of North America?

Mostly shunned from North America because of the U.S. Inflation Reduction Act, which seeks to reduce American companies' dependence on China's supply chain, battery makers in China have instead focused on Europe, the world's second-largest market for electric vehicles.

China's CATL, the world's biggest electric vehicle battery maker, has held talks with overseas sovereign wealth funds and the private offices of the super-rich about raising a \$1.5bn fund to ...

The US and Europe are aggressively raising tariffs on China-made EVs in order to protect their own automakers while at the same time subsidizing other high-tech companies from Asia to localize production: The US awarded billions of dollars in grants to Taiwan's TSMC and South Korea-based Samsung to set up chip production facilities, and ...
