

Christmas Island lagom energy

How can PRL group lead Christmas Island towards a sustainable future?

Our ambition is to help lead Christmas Island towards a sustainable future based on renewable energy. PRL Group have committed towards rooftop solar for all its owned properties on the island, and the design and development of a large-scale solar energy system for Christmas Island.

What happened to phosphate mining on Christmas Island?

Phosphate mining for 120 years has been the lifeblood of the economy and community of Christmas Island. However, in 1987, the Australian Government closed the Commonwealth operated mine with a devastating impact on the Island's economy, community, and jobs prospects, leaving many with little choice but to leave their island home.

How many people work at Christmas Island phosphate mine?

The mine still employs more than 150 people, but with leases expiring by 2034, Mr Lai concedes the operation's days are numbered. "I wouldn't say [it's] winding down, but there's always a finite life of the mine," he said. Phosphate mining has occurred on Christmas Island for more than 120 years. (ABC News: Chris Gillette)

Should the Christmas Island economy diversify?

Mark Bennett says the Christmas Island economy must diversify. (ABC News: Chris Gillette) The 1,800 residents of remote Christmas Island fear they are facing a potential economic catastrophe.

Will Christmas Island's mining operations end?

Mining operations on Christmas Island are expected to start winding down. (ABC News: Chris Gillette) Christmas Island does have another high-profile industry -- immigration detention -- which has delivered much-needed infrastructure to the Indian Ocean community, but it is by no means universally popular.

Did Christmas Island propose a wave generator?

This is all a bit late, and sad, several years back the residents of Christmas Island proposed a wave generator and had and were denied the opportunity and so now at the 11th hour they propose a poor cousin.

Leaders in the community and the Union of Christmas Island Workers (UCIW) raised money and "fought" to reopen the mine to maintain jobs and an economic future for the island. After nearly 3 years, including a court case that went to the Federal Circuit Court of Australia, Phosphate Resources was successful in gaining a 10-year mining lease ...

Christmas Island is the largest atoll in the world, encompassing about 250 square miles including the central lagoon and salt water ponds, that occupy about 125 square miles. The lagoon is a maze of deep blue channels and white sand flats loaded with the local bonefish. There are also miles of narrow flats and shallow reef zones
