Christmas Island moving solar panels

Why did we install solar & battery storage systems on Christmas Island?

Christmas Island - home to the greatest migration of red crabs in the world, and an island that is almost all national park. We installed solar and battery storage systems at two sites on Christmas Island for Parks Australia to provide clean power to their main headquarters and research field station.

Does Christmas Island National Park have solar & battery storage?

Solar and battery storage for Christmas Island National Park. Christmas Island - home to the greatest migration of red crabs in the world, and an island that is almost all national park.

Can solar power a seed cleaning shed on Christmas Island?

As part of a scientific research focusing on agriculture on exhausted mining areas, a seed cleaning shed on Christmas Island is being powered by solar+storage.

How can PRL group lead Christmas Island towards a sustainable future?

Our ambition is to help lead Christmas Island towards a sustainable future based on renewable energy. PRL Group have committed towards rooftop solar for all its owned properties on the island, and the design and development of a large-scale solar energy system for Christmas Island.

What services does a solar power company offer?

Our services includes solar and battery projects, commercial and industrial electrical installations and maintenance, emergency backup power systems, civil works, trenching, and excavation, service location and survey, and assistance with other infrastructure projects including fibre optic and communications for government agencies.

What does PRL group do for Christmas Island?

PRL Group is committed to building a more diverse and sustainable economyfor Christmas Island. We are developing a number of projects in areas such as tourism, renewable energy and fresh food production.

The Australian Government's Indian Ocean Territories (IOT) Power Service is changing the way renewable energy is regulated on Christmas Island (CI) and the Cocos (Keeling) Islands (CKI), ...

Solar power initiatives are in progress, with a vision to increase the island's renewable energy footprint and reduce carbon emissions. Solar panels have been installed on public buildings and schools, and there is potential for further expansion into residential and industrial sectors.

As part of a scientific research focusing on agriculture on exhausted mining areas, a seed cleaning shed on Christmas Island is being powered by solar+storage. The switch from polluting diesel has not only brought a low maintenance, silent and environmentally friendly solution to this remote location, but also lowered

An Australian Government investment saved thousands of Christmas Island's native creatures last year, with some help from solar power. Christmas Island is an Australian territory in the Indian Ocean, around 2,300 kilometres northwest of Perth. Much of the 135 km² island is national park, brimming with native wildlife.

The Australian Government's Indian Ocean Territories (IOT) Power Service is changing the way renewable energy is regulated on Christmas Island (CI) and the Cocos (Keeling) Islands (CKI), to generate greater local interest in, and uptake of, solar systems.

As part of a scientific research focusing on agriculture on exhausted mining areas, a seed cleaning shed on Christmas Island is being powered by solar+storage. The switch from polluting diesel has not only ...

On Christmas Island an environmental research project is transforming former mining sites into agricultural

Christmas Island moving solar panels

land. The Seed clearing shed required for the land transformation are in a remote off-grid location resulting in high operational costs for the diesel generators that power them .

Solar Power on Christmas Island. Our ambition is to help lead Christmas Island towards a sustainable future based on renewable energy. PRL Group have committed towards rooftop solar for all its owned properties on the island, and ...

Small scale solar for the local community. We installed small scale solar power systems across the islands to start the transition to a clean, sustainable future for local communities.

Christmas Island - home to the greatest migration of red crabs in the world, and an island that is almost all national park. We installed solar and battery storage systems at two sites on ...
