

What is solar power & how does it work in Bulgaria?

Solar power allows for a wide range of applications - from residential, through commercial to utility scale. Government policy and legislation aim to support investors in all types of photovoltaic projects. The support schemes in Bulgaria include premium contracts and a feed-in tariff scheme.

Does Bulgaria support small-scale solar PV projects?

Recently, the Energy Act and Spatial Development Act (SDA) in Bulgaria were reviewed to support small-scale solar PV projects. The latest changes apply to rooftop and facade photovoltaic installations up to 1 MW. These small-scale projects were freed from certain obligations during the planning and permit stages.

How big is Bulgaria's solar power?

In a matter of months, Bulgaria's total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic plants is changing almost every week as major facilities come online, and there is more in the pipeline.

How does Bulgaria support investors in photovoltaic projects?

Government policy and legislation aim to support investors in all types of photovoltaic projects. The support schemes in Bulgaria include premium contracts and a feed-in tariff scheme. Premiums apply to capacity over 4 MW, while FITs are reserved for smaller investors.

What is the future of solar in Bulgaria?

In recent years the annual growth of the solar sector has been 40% year on year, says Bulgarian Photovoltaic Association. And the future of solar is in urban projects and transport. For more information about photovoltaic projects in Bulgaria and legal advice, contact our local legal experts.

Are solar panels a viable option for self-consumption in Bulgaria?

Conversely, households and institutions interested in installing solar panels for self-consumption are still stuck with administrative hurdles. In the statistics of the International Renewable Energy Agency (IRENA), Bulgaria had 1.28 GW at the end of 2021 and 1.95 GW just one year later. The measure is expressed in nominal or peak capacity.

We specialize in the construction of photovoltaic systems for business, home and solar power plants. We provide reliable and cost-effective solutions for the use of renewable energy for the ...
