In only seven years Constant Power Solutions (CPS) has grown into an international supplier of diesel-powered generators exporting products to more than 50 countries for clients as diverse as the United Nations, Amazon and a British local authority.

At CPS, we specialise in offering high-quality bespoke containerised generator sets ranging from 110kW to 3.5MW for Diesel, LPG, CHP, and NG Gas applications. Our containerised solutions are designed to provide optimal performance across various site conditions, ensuring excellent reliability for all your power generation needs.

Re-gas and decompressed equipment are installed at the power plants to convert the compressed gas to a gaseous form in accordance to the operating requirements of the power plant. The CNG solution enables wider usage of efficient, cleaner, reliable and affordable electricity generation.

Our solutions are designed to deliver affordable and reliable electric power using Piped Gas (PG), Liquefied Natural Gas (LNG), Compressed Natural Gas (CNG) or Liquefied Petroleum Gas (LPG) by deployment of modular gas engines/turbines to customer locations.
