

What is a thermal energy storage cristopia?

At a time when we talk more and more about the environment and rationalization of energy use, our thermal energy storage cristopia represents a technical solution adapted to industrial cooling and air conditioning systems.

Why should you choose cristopia Energy Systems (STL)?

The use of modern technologies permits quality control. The materials transfer fluid. The phase change materials used by CRISTOPIA Energy and abroad. This product development work has led to a very high reliability of the STL. The STL has been conceived for hydraulic applications. Please consult CRISTOPIA Energy Systems for any other application.

What is cristopia STL technology?

costs. The STL technology (Latent Storage) Nodules inside... The CRISTOPIA STL is a Thermal Energy Storage by Phase Change Material (PCM) encapsulation. The STL system is composed of one or several tanks filled with spherical elements (called nodules) containing the PCM. The use of PCM in nodules p

How long does cristopia energy systems warranty last?

CRISTOPIA Energy Systems GUARANTEE 1. CRISTOPIA Energy Systems warrants the STL energy storage manufacturing defects for a limited time under the following conditions. The guarantee time is five (5) years after receipt of the goods. This time will not Energy Systems. 2. STL components must be used normally, meaning in accordance with the

Is cristopia energy systems liable for damage?

CRISTOPIA Energy Systems shall not be liable for any direct, for such damage is based upon warranty, contract, negligence or otherwise. money paid to CRISTOPIA Energy Systems for the particular item involved.

What makes cristopia unique?

Due to our skilled and dedicated staff, CRISTOPIA has developed a unique expertise in its field of activity. More than 2500 clients world-wide are using our technology to shift more than 800 MW of electricity every day (15,000 MWh of thermal energy are charged and discharged daily). The...

The storage technology developed by the team of Vence under the brand Cristopia ("STL" ie. Storage Latent), is a solution which allows to manage important energy cooling needs for air-conditioning and industrial cooling. The ...

LEADER IN AN EXEMPLARY PRODUCTION FACILITY CRISTOPIA is a subsidiary of CIAT Group, the European leader in HVAC with renewable energy solutions. Our leadership in Thermal Energy Storage is a

result of over 20 years of continuous technological development based on the latest production and management tools.

The storage technology developed by the team of Vence under the brand Cristopia ("STL" ie. Storage Latent), is a solution which allows to manage important energy cooling needs for air-conditioning and industrial cooling. The STL allows efficient energy management with a high reliability. Substantial operating savings are gained each year.

The manual covers the design, components, installation, commissioning, and use of the STL system to reduce energy costs and peak demand associated with cooling buildings. This technical manual provides information on Cristopia ...

Thermal Energy Storage (TES) - Cristopia EN English Deutsch Fran&#231;ais Espa&#241;ol Portugu&#234;s Italiano Rom&#226;n Nederlands Latina Dansk Svenska Norsk Magyar Bahasa Indonesia T&#252;r&#231;k&#253; Suomi Latvian Lithuanian ?esk&#253; ...

CRISTOPIA has developed a smart system to keep latent heat storage systems running at peak performance and extend their service life. Called CRISTO"CONTROL, it is the result of 20 years of know-how in thermal energy storage. It provides all the tools needed to control and monitor latent heat storage systems and perform preventive maintenance.

Fournisseur de syst&#232;mes de climatisation Carrier - ESDC - Cristopia Energy Systems Vence. D&#233;couvrez le num&#233;ro de t&#233;l&#233;phone, les avis clients (8), l'adresse, les horaires d'ouverture et les photos du Fournisseur de syst&#232;mes de climatisation.

Cristopia CRISTOPIA STL (Storage of Latent heat) technology is widely used in Europe, Asia and North America. It consists of nodules used to store the cooling energy produced by water chillers. The energy is primarily stored at night-time, when cooling demand is lower, and redelivered during the day when greater cooling capacity is needed.
