But devastation of Croatian earthquake highlights need for decent housing. Six households in rural Croatia have begun to be supplied with green solar energy - the first electricity they've had in decades.

We spoke with Birgit Coninx, Secretary-General at ASTER. ASTER is a cooperative society of social housing providers, and an initiative from Flemish social housing sector. Its goal is investing in sustainable social living. Birgit discussed ASTER's work and the positive effects that solar panels are already providing for social tenants.

Overview of the inverter. Main function: It converts the electricity generated by the solar panels into usable electricity for your home. Other functions: It monitors the solar system and the grid, transmitting data and ensuring that the system is always performing at its best. How it works: It quickly switches between two states, making the electricity usable for your home.

With 20 members turned employees, ZEZ focuses on two primary pillars: small solar systems for households, and solar investments in public buildings. In response to the surging demand for solar investments, ZEZ launched the online platform "On the Sunny Side" in 2020.

Croatia offers many opportunities for developments in the renewable energy sector, particularly solar energy. The country has one of the highest insulations in the EU, between 2000 and 2700 hours of sunshine a year. With these potentials, Croatia could become one of the most significant producers of solar energy in the EU.

Croatia had a cumulative installed solar capacity of eligible producers of 53.4MW at the end of 2020. The first photovoltaic installations under the feed-in tariff (FIT) scheme started operation in 2012 and 2013.

Renewable energy initiatives are taking centre stage globally, and one exemplary effort comes from the Zelena Energetska Zadruga (Green Energy Cooperative) in Croatia. We spoke with Zoran Kordi?, co-founder of the cooperative, who shared insights into their impactful projects, and emphasised the transformative power of solar and its potential to strengthen local communities.

# Croatia housing solar system

Yes, Zagreb has its very own grounded solar system. Back in 1971, Croatian artist Ivan Kožari?, who built a reputation abroad for his stunning sculptures, created a 2 metre diameter ...

Croatia's promising solar market is due to the climate, wide public appetite for installing rooftop solar and the 25% value-added tax for solar products being slashed last year, she said.

The project relates to the construction and operation of a number of renewable energy projects (onshore wind and solar photovoltaic (PV)) in Croatia. Additionality and Impact The EIB's investment in the project will support the deployment of new renewable energy capacity in Croatia, crucial for the achievement of the 2030 targets set out in the ...
