

Curaçao alter energy solution

Will Aqualectra revolutionize energy management in Curaçao by 2030?

As a part of Aqualectra's ongoing efforts to continue improving its services and better serve the people of Curaçao, this agreement aims to fully revolutionize energy management in Curaçao by 2030, ensuring reliable, affordable, and sustainable energy for the island.

How will a battery energy storage system benefit Curaçao?

The implementation of a Battery Energy Storage System will allow Curaçao to collect energy from renewable sources such as wind and solar energy and store it using advanced battery storage technologies. This stored energy can be released to mitigate the intermittency of wind power and ensure grid stability.

What are the economic benefits of Aqualectra's energy management system?

This system also brings us a myriad of economic benefits, such as a cutback in peak demand charges and low electricity bills for consumers and businesses in Curaçao. In addition to the Battery Energy Storage System, Aqualectra has also acquired an Energy Management System to further improve energy production and distribution.

Will Aqualectra participate in the CARILEC Conference 2024?

To further highlight the impact of their cooperation, the Aqualectra team has been invited by W&A;rtsil&A; to take part in panel discussions at the Chief Executive Officers & Leadership CARILEC Conference 2024, held from May 19th to 22nd in Puerto Rico.

How will Aqualectra's new power plant work?

Initially, the plant will provide baseload power but will be later utilised in a grid balancing role as part of the utility's decarbonisation focus. It will operate with four W&A;rtsil&A; 20V32 engines and will immediately become one of Aqualectra's most fuel-efficient power plants.

What can Aqualectra do with W&A;rtsil&A; solutions?

In addition, the W&A;rtsil&A; solutions will allow Aqualectra to expand their decarbonisation vision while smoothing the intermittency of renewables. "We have worked closely with Aqualectra in developing their long-term roadmap," explains Risto Paldanius, Vice President, Americas at W&A;rtsil&A; Energy.

The CO₂-footprint of the combined wind energy and ammonia energy storage system is 0.03 kg CO₂/kWh, compared to 0.04 kg CO₂/kWh and 0.12 kg CO₂/kWh for LNG-/coal-based energy generation with CCS ...

WILLEMSTAD - Aqualectra and W&A;rtsil&A; have taken a significant step towards a sustainable energy future for Curaçao by the signing of a Battery Energy Storage System Agreement. As a part of ...
