

How is energy used in Czechia?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Does the Czech Republic have a new energy policy?

The Czech Republic approved a new National Energy Policy (SEP) aiming to reduce energy consumption and improve the economy's energy intensity. However, reaching the targets of the SEP will require greater effort if the country is to play its part in the g

How will a storage system help the Czech energy sector?

The storage system will support the transformation of the Czech power sector and contribute to the stabilisation of the power grid by providing power balance services. "Europe's energy sector is changing dynamically, but a secure energy supply and network stability remain the cornerstones.

Will a house-sized battery help stabilize the Czech energy grid?

The House-sized Battery Will Help Stabilise the Czech Energy Grid\*The battery storage capacity is 10 MW and it exceeds the current largest battery in the Czech Republic by more than 40%. \*The system can hold 9.45 MWh of energy, three times the size of the ?EZ battery in Tu?imice.

Will the Czech Republic be able to invest in green energy?

In the period to 2030, the Czech Republic will have access to various EU funding schemes intended for green investments. Combined with technical and implementation advice, those funds may help increase investments in energy efficiency, renewable energies and in best available technologies in the industry sector.

Is the Czech Republic ready for a phase-out of coal?

A key challenge of the Czech Republic's energy sector over the next decade is to prepare for the phase-out of coal from the energy mix. As the country's only domestic fossil fuel, coal has been and still is a key energy source in the Czech Republic.

"Czechia has reduced its amenable mortality, from 140.7 deaths per 100,000 population in 2011 to 120.3 per 100,000 in 2019 (Eurostat, 2022). Reductions in amenable mortality can be seen across Europe, and Czechia ranks near the middle, between countries like Switzerland, with an age- and gender-standardized amenable mortality rate of around 50 and ...
