

Is Macao a good place to invest in solar energy?

Song and colleagues have no doubts: "Macao has some of the richest solar resources in the world" (with average annual sunlight time exceeding 1000 h, providing about 5000 MJ/m<sup>2</sup>). "Clearly, Macao has a tremendous potential for developing solar energy, especially a grid-connected photovoltaic system."

Does Macao have a photovoltaic energy contract?

The regulations require investors to enter into a 20-year contract for the purchase of photovoltaic energy with Macao's sole energy service provider, Companhia de Electricidade de Macau (CEM). Essentially CEM will purchase the electricity produced to ensure investors profit within a reasonable period.

Can Macao increase solar energy?

The Macao government also sees an opportunity to increase solar energy. To encourage the installation of PV systems, officials passed a set of safety and installation regulations in 2015.

Is natural gas a problem in Macao?

As a member of the Smart Energy Group of UM's State Key Laboratory, which focuses on optimising clean energy use and production, Zhang believes expanding the use of natural gas poses major problems, especially in the city's older districts. "Many buildings and [much of the] infrastructure in Macao are outdated."

Does Macao have a climate problem?

As a commercial hub, Macao faces the same challenge. Energy consumption from electricity, transport and buildings accounts for nearly 90 per cent of Macao's carbon emissions directly caused by fossil fuels. With climate change posing grave threats to the future of society, city leaders say they have made reducing emissions a priority.

In Macao, a company known as Melco, has collaborated with local SMEs in the development of the largest solar power plant in Macao. The project installed more than 18,000 solar PV panels spanning a total of nearly 30,000 square meters of rooftop space.

K-pop???MAMAMOO,????????????????,????????Solar(???)????????????????????10?6????? ...

"Clearly, Macao has a tremendous potential for developing solar energy, especially a grid-connected photovoltaic system. Its small and densely populated area, however, makes it unsuitable for large-scale solar-power plants, and Macao has therefore chosen roof-top solar technology as the most effective way to utilize solar energy." (A one ...
