

District Photovoltaic Panel Government Project

Will 68 solar panels be installed at a West Sussex farm?

Plans to install 68 solar panels at a West Sussex farm working towards net zero have been submitted to a council. The Woodhorn Group submitted the proposal to Chichester District Council for Reeds Farm, Oving. Panels would be installed in a yard that has stored farming equipment and silage bales for more than 50 years.

Why did we update our common project sections about solar panels?

Our common project sections about solar panels was updated in line with the amended permitted development rights so that users can gain an understanding of the criteria that needs to be met to be eligible for permitted development (or where a planning application would be needed). Loading...

Who are the members of the solar Taskforce?

The chairs are supported by a core membership made up of expert representatives from the solar industry, investment companies and others: We will publish notes of the taskforce meetings here. The Solar Taskforce has been established to drive forward the actions needed to meet the government's ambition to achieve clean power by 2030.

Do you need planning permission to install solar panels?

Current rules that require businesses to apply for planning permission if solar panels will generate more than one megawatt of electricity will also be scrapped, meaning organisations will be able to install more solar panels on rooftops without the delay and cost of applying for planning permission.

Can solar panels be installed without a planning system?

Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system. Currently those who have to go through the planning system are having to wait over eight weeks and face extra costs.
