

Do photovoltaic panels still need certificates

Does the MCS certificate only apply to solar panels?

While the focus of our article was on solar panels, the MCS covers various renewable energy products, including wind turbines, biomass boilers, and more. How often does an installer need to renew their MCS certification?

Do solar panels need a Microgeneration Certification Scheme (MCS) certificate?

Although it's not strictly required for your solar panels to have a Microgeneration Certification Scheme (MCS) certificate, it's highly recommended. Government data shows the MCS has certified over a million installations since its launch in 2007 and has around 2,000 registered installers.

Do solar PV installations need to be MCS certified?

Also, the Council of Mortgage Lenders has advised that, as a minimum to avoid the risk of a property being ineligible for a mortgage, both new and existing Solar PV installations must be MCS certified. All renewable energy products are examined by certification bodies against MCS manufacturing and testing standards.

What are the requirements for a solar PV installation company?

Competency criteria: The installation company needs to prove they have skilled employees who meet the MCS 025 Standard. This involves identifying a Nominated Technical Person (NTP) who has completed an MCS approved training course for solar PV technology.

Do solar panels need MCS or flexi-Orb certification?

It's not strictly mandatory for your solar panels to come with MCS or Flexi-Orb certification, but it's highly recommended, especially if you want to take advantage of certain financial incentives.

Do you need a 'suitable certification' to install solar?

Ofgem states that anyone installing solar PV, wind, and micro-CHP installations up to 50 kW needs to demonstrate that the installation and installer are 'suitably certified'. It also states:
