

Em3 energy Faroe Islands

What can EM3 do for SHV Energy?

EM3 brings a wealth of experience, which will support the growth of SHV Energy's renewable solution ambitions. The company has been active in the energy efficiency sector since 2006, and has an exceptionally strong mechanical, process and utility expertise.

Can the Faroe Islands be a smart microgrid?

"The energy system in the Faroe Islands is an impressive example of how all available energy resources can be integrated into a smart and innovative microgrid," says Vehkakoski.

Are there renewables in the Faroe Islands?

"In the Faroe Islands, we are blessed with renewables: we have wind, hydro and some sun in the summer; we also have tidal and wave power where we can see great potential," says Nielsen. Since announcing its green vision in 2014, SEV has already done a lot to increase the share of renewables in its energy mix.

Will the Faroe Islands use more green energy in 2025?

Even more conservative scenarios predict that the Faroe Islands' current electricity consumption of approximately 350,000 MWh per year will increase to approximately 450,000 MWh in 2025. "The current discussion recommends using more green energy and especially the potential for wind energy is quite high," says one of the islanders.

What does EM3 mean for energy and carbon savings?

The EM3 philosophy for energy and carbon savings is very much focused on decarbonisation by delivering projects that, first and foremost, eliminate waste and make the facility more efficient. The next priority projects or initiatives are the deployment of renewable electricity and the electrification of heat.
