

# Emerson network power energy systems United Kingdom

What is Emerson Network Power's Energy Systems Group?

Emerson Network Power's Energy Systems group focuses on the critical infrastructure for both core and access sites.

Who is Emerson Network Power?

Emerson Network Power has sales and service representation in most countries in SSA, sometimes maintaining direct relationships with operators, at other times working with systems integrators or partners for power and thermal management. TowerXchange: Tell us more about these 'integrated shelters'.

How does Emerson's next-generation industrial & factory automation technology work?

Emerson's next-generation industrial and factory automation technologies help manufacturers access and harness critical data to drive continuous improvement, ensure safe, reliable and sustainable processes, and optimize overall efficiency and productivity from edge to enterprise. The most exacting processes require the most exacting measurements.

What types of pressure regulating products does Emerson offer?

Emerson offers pressure regulating products for compressed air, natural gas, steam, fuel, propane, specialty gases, water, and other process fluids, with design innovations and durability suitable for the harshest and most hazardous environments in the world.

Does Emerson offer certified electrical protection?

Emerson's portfolio of electrical and lighting products provides certified protection for your applications. Our trusted Appleton, EasyHeat, Nelson and O-Z/Gedney brands make electrical installations safer, more productive, and more reliable.

Why should you choose Emerson control & software solutions?

Optimization is the key to a sustainable and profitable future. Emerson's control and software solutions empower you to build safer, secure, and more environmentally efficient manufacturing processes tailored to your specific needs.
