

Djibouti's substantial potential for geothermal electricity generation, along with its rising capacity to produce energy from wind and solar power plants, should help the country reach its goals in coming years. In addition to the growing need for generation capacity, the expansion of renewable energy is key for Djibouti to diversify its economy.

The U.S. Embassy in Djibouti helped Colorado's CR Energy Concepts (CREC) close a deal with the Government of Djibouti to construct a \$190 million Renewable Energy Park - the first infrastructure project in Djibouti to be built by the U.S. private sector.
