

Bioenergy represents more than two thirds of the overall consumption of renewable energy in Denmark. We use more and more bioenergy, and many power plants are switching from fossil fuels to wood pellets, wood chips or straw. The production of biogas is increasing rapidly, and it is expected to triple from 2012 to 2020. ...

Installer I install Victron Energy products. Dealer My company is a dealer which is buying products from Victron Energy distributors. Distributor My company is a distributor of Victron Energy. Email address. Password. Country. Select your country

Clean energy is a Danish passion. Today, 50 per cent of electricity in Denmark is supplied by wind and solar power. Wind energy is well-established in Denmark, which long ago decided to put the Danish climate " s constant breezes and blusters to practical use. Now Denmark produces almost twice as much wind energy per capita as the runner-up among industrialised countries in the ...
