

Why is Syria's energy sector in turmoil?

Syria's energy sector is in turmoil because of the ongoing civil conflict that began in the spring of 2011, with oil and natural gas production declining dramatically since then. Syria's energy sector has encountered a number of challenges as a result of conflict and subsequent sanctions imposed by the United States and the European Union.

What happened to Syria's oil & natural gas industry?

Syria, previously the eastern Mediterranean's leading oil and natural gas producer, has seen its production fall to a fraction of pre-conflict levels. Syria is no longer able to export oil, and as a result, government revenues from the energy sector have fallen significantly.

Why did a tanker carry Iranian oil to Syria?

LONDON, Dec 9 (Reuters) - A tanker carrying Iranian oil to Syria turned round in the Red Sea to head away from its original destination after the fall of Syrian President Bashar al-Assad. Syria's 13-year civil war crippled the country's energy sector, making it highly reliant on imports from Iran. Below are facts about Syria's energy sector.

Who regulates oil & natural gas in Syria?

In 1964, Syria passed legislation that limited licenses for exploration and investment to the Syrian government. The Ministry of Petroleum and Mineral Resources oversees the Syrian oil and natural gas sectors, and is in charge of setting policy priorities and coordinating the efforts of the state-led companies that operate in the sector.

What happened to Syria's electricity generating capacity in 2012?

Syria's electricity generating capacity was 8.9 gigawatts in 2012, although damage to electricity generating facilities, high voltage power lines, and other infrastructure has likely reduced the country's effective capacity. Electricity distribution losses, already 17% of total generation in 2012, have likely climbed even further.

Who owns Syria's natural gas?

The Syrian Gas Company (SGC)--which fell under the GPC--was the key entity in Syria's upstream natural gas operations, a position it inherited after being split off from the SPC in 2003. Syria's natural gas distribution network was managed by the SCOT.

Energy system of Syria The 2009 Syrian Law on Energy Conservation aims to fulfil the sustainable development requirements of the country and deploy various renewable energy applications. Private and public institutions must commit to energy efficiency practices, use renewables and high energy- efficiency equipment.

Union Electric Group is gearing up to help address Syria's critical energy requirements as the war-torn nation embarks on reconstruction after the ouster of the longtime ruler Bashar Assad, a senior official said on Monday.

Several factors have contributed to Syria's accelerated transition to renewable energy. First, the war has severely damaged traditional energy infrastructure, driving local communities to seek sustainable alternatives. Second, displacement has put pressure on host communities, increasing the demand for electricity.

However, Syria needs a massive investment to rehabilitate its oil sector, while its primary focus now will be on replacing Iranian barrels to keep its economy moving.

Union Electric Group is among the biggest establishments of its kind, originally found to meet the rising demand for energy in the local and regional markets. It's considered as a leading establishment in the electrical industry and represents an extremely important role in the reconstruction process that Syria is currently undergoing.

Here's a look at the U.S. fight against the Islamic State group: What's the U.S. military presence in Syria? The U.S. has about 900 troops and an undisclosed number of contractors in Syria ...
