

# Equatorial Guinea need for energy storage

The government has received 21 bids for 14 of the 27 blocks offered in its licensing round, which closed in September, and plans to announce awards in Malabo on 26 November. Speaking during a country presentation at Africa Oil Week on 7 November, energy and mines minister Gabriel Mbaga Obiang Lima said bids for EG-27, EG-23, EG-18, EG-09, ...

American multinational oil and gas corporation ExxonMobil will exit Equatorial Guinea in the coming months, with plans to transfer its investments to the government in Q2, 2024. The decision to withdraw from the country aligns with the company's long-term strategy, ExxonMobil said in a statement, marking an end to almost three decades of ...

Malabo, Equatorial Guinea, August 20 - Equatorial Guinea is set to construct the first liquefied natural gas (LNG) storage and regasification plant in West Africa, advancing efforts to monetize gas resources through the creation of a domestic gas-to-power infrastructure.

With aging assets, technically challenging small fields and a high cost of exploiting them, Equatorial Guinea is among the producers that are exposed to energy transition pressures. The government's key concern is, ...

Country Review Equatorial Guinea History Equatorial Guinea (the Republic of Equatorial Guinea) includes a large island (Bioko) in the Gulf of Guinea and a mainland region (Rio Muni), bordered by Cameroon (north) and Gabon (south and east). Early Baka (pygmy) tribes were overwhelmed by Bantus who evolved into the Fang tribe of Rio Muni and the

Two Ghanaian businesses have established a chemical blending and storage facility, in Kejebril in the Ahanta West Municipality of the Western Region. The partners, Ensol Energy Ghana Limited and Eco Natural Resources, christened the facility as, "Zen Chemicals Limited". It has a 15-tonnes capacity.

The government has contracted US company MAECI Solar, in collaboration with GE Power & Water and Princeton Power Systems, to install a 5MW solar microgrid system on Annobon Island. The microgrid will provide electricity for the island's 5,000 residents using GE's battery-based energy storage system, which is designed to withstand the high temperatures ...

Source: Energy Capital & Power | Nov 29, 2022 Equatorial Guinea, Democratic Republic of the Congo (DRC) to Develop Joint Oil Refinery and Storage Facilities. The two African oil producers inked a critical Memorandum of Understanding during the opening ceremony of the Angola Oil & Gas 2022 Conference & Exhibition

# Equatorial Guinea need for energy storage

How rapidly will the global energy storage market grow? Global installed energy storage capacity is forecasted to expand 56% to reach over 270 GW by 2026. The main driver is the increasing need for system flexibility and storage ...

Independent energy firm Panoro Energy advanced its production portfolio in Equatorial Guinea with a series of drilling activities and a new partnership in November 2024. This month, Panoro Energy brought one of its two infill wells at Ceiba field online and completed one infill well at the Okume Complex.

About GEO. GEO is a set of free interactive databases and tools built collaboratively by people like you. GOAL: to promote an understanding, on a global scale, of the dynamics of change in energy systems, quantify emissions and their impacts, and accelerate the transition to carbon-neutral, environmentally benign energy systems while providing affordable energy to all.

UK-based global independent exploration and production company Panoro Energy has launched a three-well drilling campaign in Block G in the Equatorial Guinea.. Drilling has begun on a new infill well, set to be completed by the end of Q1 2023, using the Island Innovator semi-submersible rig.

Howard McDowall, director and general manager of Luba Freeport, discusses with TOGY the plans to expand the quay at Luba, as well as obstacles to Equatorial Guinea's ambition of becoming a regional logistics centre for the oil and gas industry of the region. He also addresses challenges of running the port with such a decrease in drilling activity due to low oil ...

For Equatorial Guinea, which enjoys a strategic position in the Gulf of Guinea, gas-to-power offers the potential to anchor the development of a regional power economy. Given its current energy output and relatively small population of 1.4 million, the country has been able to meet domestic energy demand with self-produced power to date.

Fields developed in the period 1996 - 2011 are the 1.1 billion barrel ExxonMobil operated Zafiro Field, offshore Bioko Island which came onstream in 1996, the Amerada operated Ceiba Field, which ...

ExxonMobil's work here has also helped open Equatorial Guinea for investment from other oil and gas majors and independent companies, including Chevron, Marathon Oil, Kosmos Energy, Panoro, EG LNG, Africa Oil Corporation, Trident Energy, etc. During its tenure in Equatorial Guinea, ExxonMobil emphasized training and employing local residents ...
