Will France increase its solar power capacity by 2023?

France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers feed-in tariffs for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with a specific grid tariff for collective users and exemption from the domestic tax on electricity for projects under 1 MW.

How big is residential solar PV in France?

The average size of residential solar PV systems is estimated to be 3.24 kW moving to 2030. The technical potential for residential solar PV in France is estimated at 34,810 MW. The payback time for residential Solar PV in France is 25.1 years as of 2015.

How much insolation does France have?

The insolation in France ranges from 3 sun hours/day in the north to 5 sun hours/day in the south. The output of a solar array is a function of age, temperature, tilt, shading, tracking, and insolation. France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023.

When did solar PV start in France?

Solar PV installations in France started being substantial only from around 2008. Between 2009 and 2011 PV capacity grew almost tenfold, from a relatively low level.

How much does solar cost in France?

A French law passed in 2023 will require parking lots larger than 50,000 square feet (4,600 m²) to build solar canopies covering half their area. This could result in installed capacity of 6.75-11.25 gigawatts, at a cost of \$8.7-14.6 billion. The insolation in France ranges from 3 sun hours/day in the north to 5 sun hours/day in the south.

Is France a good country for solar power?

In 2016, France was ranked 4th in the EU by installed capacity and 14th in terms of PV capacity by inhabitant at 107.3 Wp/Inhab compared to the EU average of 197.8 Wp/Inhab for the year. The country's largest completed solar park to date was the 300 MW Cestas Solar Park.

WASSHA Africa Uganda Limited is a fast-growing start-up solar energy company in Uganda offering alternative energy solutions to people with no or limited power access.
