

Ganhanfang Photovoltaic Panel Theft Case

Did thieves steal a six-foot solar panel in Jinan?

But that was last month. Five days after the road opened in the industrial city of Jinan for testing on Dec. 28, inspectors found that one six-foot panel was missing -- allegedly plundered by thieves, according to the Qilu Evening News, a local newspaper. The purported thieves had also damaged seven surrounding panels.

How much does a solar theft cost?

Strecke says European solar thefts typically cause EUR60,000 (\$63,900) of damage, when repairs and loss of business are factored in. "Solar crime is on the increase," says Rachael Oakley, director of crime intelligence at Telford-based DeterTech, formally known as SmartWater Group thanks to its product-marking technology.

Are solar panels being stolen in the UK?

That figure - reported by Detective Superintendent James Taylor, head of UK serious organized acquisitive crime unit Opal - included a rise in small-scale theft of solar panels as rising energy bills and the cost-of-living crisis bite. And the UK experience is far from unique.

How many solar panels can a thief remove?

Viamon's Strecke says organized raiders typically remove 100 panels to 300 solar panels - 10 tons' worth at the top end. In one case, he adds, thieves removed more than 15,000 panels - 5 MW of generation capacity - in one weekend. "It is organized crime, with big logistics in the background," he says.

How much property was stolen from UK solar sites last year?

Speakers at the event, held in Telford, in the west of England, appealed for solar site owners to report all incidents of criminal damage, no matter how small. Taylor said GBP 574,300 (\$691,500) worth of property was reported stolen from UK solar sites last year, but noted that the real figure is likely higher.

Are solar farms a crime hotspot?

"When you consider the rural locations of some of the solar farms, it's a high-reward, relatively low-risk crime," he added. Attendees at Telford heard the counties of Herefordshire and Worcestershire, in the West Midlands, are the UK's solar crime hotspot, followed by Nottinghamshire, Cambridgeshire, and Kent.
