

Does Genexus automatically load a grid?

Yes: Grids load automatically. This is the default value. GeneXus performs an automatic pagination if the Rows property of the grid has a value other than zero. The buttons inserted depend on the number of records to be shown and the number of lines of the grid.

What is a condition property in Genexus?

This property applies to the individual control for which it is defined. It must not be confused with the Conditions tab of the GeneXus object (whose aim is to apply filters to the whole object: form, all the Grids, etc.). This property applies only at design time. Consider a Knowledge Base containing the following Transaction object s:

How do I add a grid in Genexus?

There are different ways to add a Grid: Drag the Grid icon from the Toolbox to the desired location on the Web Layout of the Web Panel /Layout of the Panel. Select Insert > Grid from the GeneXus main menu. Next, a Selector window will be opened to select which attributes/variables you want to include in the Grid.

What is a grid control in Genexus?

The Grid control displays data associated with many records. In some cases, it also allows entering, updating, and deleting data. You can include a Grid control in GeneXus objects with UI (User Interface/screen). The Grid control has different capabilities depending on the object in which it is located. It is important to understand them.

Why is there an 'implicit' for each grid line in Genexus?

Every grid line loaded is like the print executed in each iteration of the listing's For each command. When GeneXus can automatically determine a table to be browsed in order to load the grid lines, it does so, and in that case you won't need to provide that information. That's why we say there is an 'implicit' For each.

What is a condition attribute in Genexus?

Attributes must belong to the Extended Table of the Base Table where the condition is applied. This property applies to the individual control for which it is defined. It must not be confused with the Conditions tab of the GeneXus object (whose aim is to apply filters to the whole object: form, all the Grids, etc.).

ordenes, searches y condiciones sobre los datos mostrados. Válido para: Evolution 3. Dado un Panel o Work With for Smart Devices, ¿cómo especificamos por qué criterio o criterios queremos ordenar la información a desplegar en un grid? ¿Cómo especificamos criterios de búsqueda, filtros avanzados y otras condiciones?

Genexus grid conditions Sint Maarten

As form GeneXus X Evolution 3 you can resolve this problem using the Matrix Grid Control to display data in two-dimensional grids. How to use it? The Matrix Grid Control is a new type of grid control, to use it you just need to insert a grid on our screen and select Control Type = SD Matrix Grid. There will be listed the corresponding ...

The Form (Grid and outside the Grid, visible or hidden) Grid Order; Grid Conditions; Grid Data Selector; Events (outside all For each commands) GeneXus calculates the smallest Extended Table of all possible extended tables containing the attributes mentioned, and it chooses for the Grid one base table that allows access to the calculated ...

When the generator does not support conditional constraints. When the condition cannot be evaluated by the DBMS. For instance, the conditional attribute is a formula, that calls an UDP or refers a function that can not be evaluated by the DBMS. In this case; if there is a formula attribute used in the grid conditions; the LastPage paging button does not work ...
