

What are critical power solutions?

Aeg Power Solutions offers critical power solutions that provide full power protection against mains power issues. These solutions reduce the risk of critical process downtime, data loss, and safety system failures. Operating safely in sectors like oil, gas, and petrochemicals requires 100% reliable electrical power.

Why is critical infrastructure important in Germany?

Even short downtimes mean enormous losses in sales, especially for industry, which is an important pillar of the German economy. Of course, critical infrastructure plays a particularly important role in emergency power supply. This includes medical facilities, schools, fire departments, waterworks and other public institutions and organizations.

What role does critical infrastructure play in emergency power supply?

Of course, critical infrastructure plays a particularly important role in emergency power supply. This includes medical facilities, schools, fire departments, waterworks and other public institutions and organizations. In each case, emergency power technology provides the necessary security to be prepared for short-term power failures.

The solution chosen was a DEIF power management system with two AGC 150 Mains and two AGC 150 Genset controllers working in parallel to provide redundancy, plus an ALC-4 load ...

The solution chosen was a DEIF power management system with two AGC 150 Mains and two AGC 150 Genset controllers working in parallel to provide redundancy, plus an ALC-4 load controller for load handling. The controllers ...

From oil and gas and transportation to utilities, nuclear power and other critical infrastructure, we provide rugged, fully reliable electrical power back-up solutions that are tailored to your specific requirements. This provides access to safe, consistent, dependable power, even in ...

Our Uninterruptible Power Solutions (UPS) protect against mains power issues to ensure safe operation, protect people and reduce the risk of downtime and system failures. From oil and gas and transportation to utilities, nuclear power and other critical infrastructure, we provide rugged, fully reliable electrical power back-up solutions that ...

Established in 1909, Piller Power Systems is Europe's leading producer of uninterruptible power supply (UPS) systems for mission-critical power applications such as data centres and semiconductor manufacturing. Piller also manufactures ground power systems for civil and military airports and on-board electrical systems for naval vessels.

Germany critical power solutions

NEC Energy Solutions (NEC), a wholly-owned subsidiary of NEC Corporation, announced today that they have completed and commissioned the largest energy storage system in Europe for Germany-based EnspireME, ...

Ensure the availability and reliability of your critical applications with Vertiv's complete range of reliable UPS energy storage and power distribution systems. Protect your equipment and applications with solutions configured to meet your specific needs.

NEC Energy Solutions (NEC), a wholly-owned subsidiary of NEC Corporation, announced today that they have completed and commissioned the largest energy storage system in Europe for Germany-based EnspireME, a joint venture between Eneco, a Netherlands-based renewable energy company and Mitsubishi Corporation.

The solution chosen was a DEIF power management system with two AGC 150 Mains and two AGC 150 Genset controllers working in parallel to provide redundancy, plus an ALC-4 load controller for load handling. The controllers communicate over a CAN bus connection and are mounted in an all-new switchboard that also includes DEIF power and voltage meters.

WELCOME TO ANORD MARDIX: The world's leading electrical engineering and manufacturing firm specialising in critical power solutions. Our commitment to comprehensive engineering excellence ensures our products and services deliver safe, reliable, quality critical power solutions that you can rely on.

Uninterruptible power supply (UPS) systems are ideal for supplying critical loads without interruption. This is basically a powerful battery installed in the switchgear room of a building. As soon as a power failure occurs, the battery kicks ...
