What is the Ghana energy transition & investment plan?

H.E. Nana Akufo-Addo launched the Ghana Energy Transition and Investment Plan on 21 September 2023 during the UN General Assembly. The plan marks Ghana's commitment to fighting climate change and fostering economic development in tandem.

What is Adden Energy?

Adden Energy is a start-up co-founded by Xin Li, William Fitzhugh, Luhan Ye, and Fred Hu. The company aims to scale its novel technology up to a palm-sized pouch cell, and then upward toward a full-scale vehicle battery in the next three to five years.

What can Aden energies do for You?

Aden Energies can finance all capex investment in your site's new energy assets, and manage your energy transition, from project design into long-term operations. Not just a "one and done" energy fix - Aden Energies specializes in long-term operation of your energy infrastructure.

Will Ghana achieve net zero by 2060?

If the plan is achieved in full, it would generate 400,000 net jobs within Ghana's economy. The country's existing Energy Transition Framework previously set a target of net zero by 2070, but this new plan shows Ghana has increased its ambition and is targeting net zero by 2060. Various sectoral changes and technologies are proposed in the plan.

How does Aden energies work with Budweiser?

These work together to efficiently manage energy and provide rapid response to grid demands. Aden Energies is proud to be an energy & decarbonization partner for Budweiser in a period when it beat emissions targets by two years, and achieved a 60.8% reduction in greenhouse gas emissions from operations.

Will Ghana's emissions increase in 2021?

Without pursuing the plan, under a business-as-usual scenario, Ghana's emissions are expected to rise from 28 Mt CO₂e in 2021 to over 140 Mt in 2050, with the bulk of emissions growth coming from transport, driven by population growth, GDP per capita growth, and vehicle ownership.

YEN .gh reported that John Jinapor, the Ranking Member on Parliament's Energy Committee, has warned that Ghana's energy sector is on the verge of collapse. He claimed the Akufo-Addo-led government had forced the Ghana Gas Company to sign dubious contracts, contributing to the power shortfall.

The Bridge Power Plant is designed to integrate seamlessly into Ghana's energy mix, providing efficient and environmentally sustainable electricity. Its cutting-edge technology ensures lower carbon emissions, aligning with the government's commitment to ...

Ghana adden energy

It details a credible pathway for how Ghana can achieve net-zero energy-related carbon emissions by 2060 through the deployment of low-carbon solutions across key sectors of its economy, including oil and gas, industry, transport, cooking, and power.

Developed by Endeavor Energy, a leading United States Independent Power Producer focused on Africa and Andaris Energy Limited, a wholly owned Ghanaian energy investment company, the GBPP is a 515 Mega Watt power plant.

It details a credible pathway for how Ghana can achieve net-zero energy-related carbon emissions by 2060 through the deployment of low-carbon solutions across key sectors of its economy, including oil and gas, ...

Ghana has immense potential for renewable energy projects: wind energy could provide up to 5000 MW, and enough solar radiates to supply nearly 100 times what the country currently requires.[1] Hydropower from 3 dams, Aksombo, Kpong, and Bui, provide 54% of the country's current electricity.
