What is the Gibraltar Electricity Authority?

Gibraltar Electricity Authority is an agency under the Government of Gibraltar responsible for regulating the Gibraltar electricity market. The authority was created on 28 March 2003 under the Gibraltar Electricity Authority Act 2003. Its responsibility is to generate, distribute and supply electricity to the civilian population of Gibraltar.

How many power stations are there in Gibraltar?

There are currently three installations in Gibraltar producing energy. Two of these installations namely Waterport and OESCO power stations supply electricity to the civil population,...

Why does Gibraltar need a LNG power system?

The people and businesses of Gibraltar will have better air quality, a quieter environment, and see the rewards of better energy efficiency. Michael Caetano, Chief Operational Officer of the Gibraltar Electricity Authority (GEA) When Gibraltar upgraded its nearly 40-year-old power system, they opted for a unique LNG solution.

Where is Gibraltar's new power station located?

The location of the new power station is on the North Mole in Gibraltar Harbor, an advanced arrangement of a gas-fired power station with an LNG hub which will serve as the basis of the island's future power supply.

How does Gea work on Gibraltar?

With this new power plant, the GEA has nearly 100% automatic operation. Much less operator intervention is required." With only 6.5 square km available on the entirety of the island, space is a precious commodity on Gibraltar.

Are RECOM products counterfeit?

We cannot exclude the possibility that RECOM products purchased from other sources are counterfeits. Please note that you may be liable to damages for breaching competition and trademark protection laws by purchasing RECOM products from unauthorised sources, and that we cannot honour any guarantee claims on such products.

For example, RECOM offers a range of filter components that have been evaluated with power conversion products that can be assembled to evaluation boards to check for overall system EMI performance. EMC test facilities are also available for RECOM customers to debug system issues and do pre-compliance testing.

From this centralized office, the RECOM Power, Inc. team provides sales and technical support services for all North and South American markets. We serve large original equipment manufacturers (OEMs) and smaller, lower volume users through our network of sales representative firms and distributors in the Americas.

SiC and GaN power devices operate at higher temperatures and frequencies than Si, allowing for more efficient power conversion in existing designs and even allowing the use of new topologies that are not feasible with silicon devices. Power supplies utilizing these materials can be more compact and lightweight, with improved overall performance.

Modular converters were always considered to be more expensive than discrete solutions. However, with the commissioning of its own SMT factory, RECOM is able to offer select converter series at very attractive prices. With economy of scale, RECOM is able to realize cost savings compared to similar power supply products at a very high quality.
