

Google sunroof project Sweden

What is Project Sunroof?

Project Sunroof puts Google's expansive data in mapping and computing resources to use for people and organizations interested in solar power, helping illustrate the potential of solar power for a single house, and with the introduction of the data explorer, the potential of solar for zip codes, cities, counties and states.

Does Project Sunroof have solar data?

We currently have solar data for portions of 50 states and Washington DC. See if we've got you covered. Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.

Why should you choose sunroof?

At SunRoof, we're making solar energy accessible to all. Our integrated 2-in-1 solar roof system combines Swedish design with the most powerful solar solution. Perfect for new constructions, renovations, and commercial projects. Join thousands of satisfied customers who have switched to SunRoof for a more sustainable lifestyle. Why SunRoof?

What is sunroof & how does it work?

Initially launched to drive consumer awareness and education, the service now also makes it easy for interested homeowners to connect with solar providers in their area. Sunroof covers 43 million rooftops in the U.S. -- which is more than 50% of all households -- and in the coming months will be available in all 50 states.

What is a sunroof roof?

The most efficient solution on the market, providing independence from rising electricity prices and translating into greater savings. Cheaper than a regular roof plus PV panels, SunRoof is an economical and aesthetically pleasing solution.

How much data does sunroof process?

Sunroof processes roughly 1 petabyte (1,000 terabytes) of data: height and color for 43 million homes; weather information; about 1,000 state and local incentives; and hundreds of local electricity rates. Over the past 3 years, Sunroof has grown from a part-time project to a full-time job for Elkin and his team.

Project Sunroof is an innovative initiative by Google that aims to accelerate the adoption of rooftop solar energy. Using the power of Google Maps and the Solar API, Project Sunroof provides homeowners with detailed information about their rooftop's solar potential, including the amount of sunlight it receives and the estimated energy production that can be ...
