

Why should Mexico invest in green energy?

Regardless of which option is chosen, Mexico must implement these clean energy sources for the development of the country, society and the world. Today, private and public organizations must work together to find intelligent solutions to combat climate change. In fact, there is a company that devotes its efforts to the production of green energy.

How can Mexico support a global green transition?

With energy demand expected to grow about 3% to 4% annually, Mexico must expand its renewable energy production to meet its climate goals and support a global green transition. We expect the development of significant new wind and solar projects and the introduction of major new EV factories to drive the country's green energy sector.

Which energy sources can be used in Mexico?

From all the clean energy sources in the country, two have enormous potential: Solar or photovoltaic energy for the center and north of Mexico. According to international studies, our country is located in the coordinates most favored by the sun's rays, which translates into an unparalleled natural opportunity to collect solar renewable energy.

Stage One of the IGE Liquid Hydrogen Project will be the Arrowsmith Project, located in Western Australia. This installation will commence production in late 2025 resulting in 23 tonnes ...

Our green solution that allows companies to guarantee the use of energy from renewable sources in their operations. More and more consumers are making purchasing decisions based on the impact that brands have on the ...

Since 2008, the Italian company Enel Green Power has promoted renewable energy development in Mexico, focusing not only on supplying clean energy solutions but also on offering tailor-made alternatives to the more polluting standard electricity options.

We expect new clean energy projects to support decarbonization and help Mexico to undergo a green transition. In 2022, Mexico pledged to double its renewable energy capacity by 2030, with plans to develop another 30 GW of green energy. Mexico's Foreign Minister Marcelo Ebrard stated at COP27 that the government plans to invest \$48 billion in ...
