

In its Energy Roadmap 2050 and National Plan 2010-2022, Honduras has set a target to achieve an 80% share of renewable energy in the country's total electricity generation by 2038, up from the current 60%. However, national ...

OverviewEnergy sourcesLegal and policy frameworkSee alsoSources In 2021, Honduras' energy mix was led by oil, constituting 52.3% of the total energy supply, followed by biofuels and waste at 33.7%. Modern renewables, which exclude traditional biomass practices like burning wood or agricultural residues, accounted for 13.7%, while coal made up just 0.3%. Currently, 33 percent (502 MW) of the installed capacity of the national interc...
