

What is greenpack & how does it work?

The well thought-out GreenPack concept with rental batteries and change infrastructure solves the known disadvantages (short ranges, high purchase price of the battery, battery wear, ...) of permanently installed batteries in electric vehicles. This makes the switch from the combustion engine to the electric vehicle inexpensive and sensible.

How many batteries does a greenpack boat have?

The three GreenPack lithium-ion batteries at the bow provided the engine with sufficient energy for the 30-km-long route. The GreenPack batteries attracted a lot of interest from spectators and boat owners. Due to the modular approach, the GreenPack rechargeable battery is an ideal partner for electric mobility on the water or on land.

What is a greenpack rechargeable battery?

Due to the modular approach, the GreenPack rechargeable battery is an ideal partner for electric mobility on the water or on land. GreenPack at the MobiliTec 2016 in Hanover. Together with other members of the Bundesverband Solare Mobilität e.V. (Federal Association for Solar Mobility - BSM), GreenPack will be exhibiting at a community stand.

Why should you choose a greenpack system?

Choose from our different motors and battery packs the system that suits you best. An intelligent automatic battery changer, energy-charged GreenPacks and a wide range of possible applications - that's the GreenPack system. The uncompromising safekeeping for your batteries, both for storage and transport.

Carla Cargo is an efficient bike trailer and trolley for large and bulky payloads. With the strong electric motor and two powerful disc brakes, the ride becomes a safe and enjoyable driving experience. Carla Cargo trailers can be used with any commercially available bike, pedelec or e-bike. Suspended by bike, Carla acts as a motorised trolley and can be used in pedestrian ...

A GreenPack is impressive due to its handiness. To increase the number of application options, we are working on solutions to convert 48V DC into 230V, with the least amount of loss possible. Let us provide you with a consultation if you want to use our energy containment unit outdoors.

Quick-dry towel: Quick-dry towels are so convenient because they fold up small and dry quickly, especially if you're planning on camping, staying in a hostel, or swimming in the natural pools.. ...

2nd place at the Berlin E-boat Regatta for the GreenPack team. Hannover Messe 2016 - MobiliTec 2016 special show. Energy Storage Lab 2016 - Berlin. International Cargo Bike Festival 2016 Nijmegen, NL ...

Die Energybox wird dabei von einem GreenPack Akku betrieben. Du kannst ihn entweder im Vorfeld zu Hause laden oder du bleibst flexibel und nutzt die Swobbee Infrastruktur für dich. Dort kannst du unkompliziert deinen leeren GreenPack Akku gegen einen vollen wechseln. Hier zu benutzst du nur 30 Sekunden.

Das durchdachte GreenPack Konzept mit Mietakkus und Wechselautomaten ist die bekannten Nachteile (kurze Reichweiten, hoher Anschaffungspreis vom Akku, Akkuverschleiß,...) von fest installierten Akkus in E-Fahrzeugen.

The Energybox is powered by a GreenPack battery. You can either charge it in Advance at home or you stay flexible and use the Swobbee infrastructure for you. There you can easily exchange your empty GreenPack battery for a full one. All you need is 30 seconds to do it. Do you know Swobbee? You can contact us directly for more information.
