

DAS Energy photovoltaic modules differ significantly from conventional glass-foil modules due to their low weight and are also ideally suited for roofs with low load-bearing capacities due to their flexibility and lightness. Installation is simple, as the modules can be glued directly to the sheet metal, bitumen, glass or membrane roof.

Guatemala is the second largest Central American power market, with a goal to increase renewable energy use. Relatively high levels of solar irradiance and large areas of cleared land give the country a strong potential for increased solar energy development.

Moreover, Guatemala plans to reach 80% renewable energy utilization by 2030. Our authorized distributor, ECOLOGICO SOLAR, finished an on-grid system of 12.6 kW for residential installation in Zone 15, in Guatemala City. This system consists of 28 panels EGE Helios plus 450w mono 9BB, that possible to provide the highest efficiency of 20.81%.

Albedo puts solar power within reach of businesses struggling with high electricity costs. In a country with high electricity costs and limited financing options, Albedo is offering a sustainable solution to a very costly problem for all of Guatemala and the planet .

Since 2024, our sales and installation partner, DAS Kraftwerk GmbH, has been working with us to plan and install your DAS Energy PV system. Our flexible solar modules are particularly suitable for roofs with limited load-bearing capacity, ...

Guatemala City, located in the tropics of Guatemala, is a great place for generating solar energy all year round. This is because it gets consistent sunlight throughout most of the year. The energy generated from solar panels can vary slightly with each season but overall, it's quite steady.

La energía solar presenta la gran ventaja de que el Sol brinda una fuente energética inagotable. Las instalaciones para su aprovechamiento no contaminan la atmósfera, no producen gases de efecto invernadero ni tampoco contaminación del agua. Además, no produce contaminación acústica, ya que su generación es silenciosa.
