

Guatemala sunware solar panels

Where are sunware solar panels made?

SunWare solar panels are designed and manufactured for extreme application conditions. From use on sea buoys and boats to avalanche bridges, SunWare marine solar panels and solar systems are used worldwide wherever reliability, durability, robustness and freedom from maintenance are required. Made in Germany by SunWare.

What are sunware solar panels used for?

SunWare solar panels are designed for extraordinary wind and temperature loads. Usage, among other things, in safety-relevant technology such as avalanches and glacier monitoring devices. Solar systems for public spaces.

Is Guatemala a good place to invest in solar energy?

Guatemala is the second largest Central American power market, with a goal to increase renewable energy use. Relatively high levels of solar irradiance and large areas of cleared land give the country a strong potential for increased solar energy development.

Why did BMR decide to buy a solar farm in Guatemala?

As part of its evaluation process, BMR determined that the solar farm offered a strong return that was supported by Guatemala's well-established and stable regulatory system. BMR navigated a complex and cooperative sales process that involved four owners across three legal jurisdictions.

What is inside a solar panel package?

Inside the panel package there are white screw rosettes for countersunk screws. It prevents damages of the panels laminate by the screw head. The solar panels are designed for the harsh marine and salt water use. The cable outlet is screwed to the mounting plate, completely sealed and 100% saltwater proof.

What is a solar panel made of?

The carrier material is an aluminum sandwich core. By the core material the cells are perfectly supported and protected. The solar panel adapts to curved surfaces, with maximum curvature of 3cm/m panel length. Inside the panel package there are black screw rosettes for countersunk screws.
