How many staff does Guernsey Electricity employ?

Guernsey Electricity employs around 200 staff in a wide range of positions including retail, electrical operations, plumbing, finance, customer service, power station maintenance, and engineering.

Does Guernsey Electricity charge a monthly charge?

Where Guernsey Electricity is required to provide a standby electricity service for 'behind the meter' non-renewable energy installations (including CHP) with generation capacity in excess of 25kW, a monthly charge will be applied. For every kW of installed capacity, we charge the standby rate.

What are Guernsey's on-Island initiatives?

Alan Bates, CEO at Guernsey Electricity, said: "These on-island initiatives are designed to increase the amount of electricity generated from local renewable sources. "The electricity feeds directly into the island's network so that all our customers can benefit from locally generated, clean solar energy."

We believe that everyone in Guernsey should be able to use and benefit from renewable electricity. Guernsey Electricity has installed some of the largest solar arrays in the Channel Islands which feed more than 600kW of renewable electricity into the grid for ...

Guernsey's electricity utility has unveiled the island's largest solar installation to date on the rooftop of a power station, which it says will make every customer "proud" to have local renewable electricity.

Guernsey solar power on grid system

The project will help Guernsey Electricity and Guernsey Post reach significant milestones in their ambitions for generation with the use of renewable energy, with the further benefit for Guernsey Post of powering all ...

Together, these systems have supplied more than 300,000 kilowatt hours (KWh) of renewable energy to the grid per year since the first installation in 2018, enough to power around 600 electric cars.

To offset the increase in carbon emissions, Guernsey Post has invested in 82 electric vans and partnered with Guernsey Electricity to link the electricity usage of these vans with the carbon reduction created by using the PV system as a generator supplying the grid.

Guernsey Electricity has reached a significant milestone as one gigawatt hours of renewable electricity has now been produced on-Island for the first time and the company is calling for decisions to be made on the long-term future of energy supplies.

The Little Green Energy Company have just installed 309 roof mounted solar panels with Guernsey Electricity Limited on the power station, Northside, Vale, creating the largest solar array in the Channel Islands, generating over 100kWp of power.

To offset the increase in carbon emissions, Guernsey Post has invested in 82 electric vans and partnered with Guernsey Electricity to link the electricity usage of these vans with the carbon reduction created by using the ...
