Heard Island and McDonald Islands are located in the Southern Ocean, approximately 1,700 km from the Antarctic continent and 4,100 km south-west of Perth. As the only volcanically active subantarctic islands they "open a window into the earth", thus providing the opportunity to observe ongoing geomorphic processes and glacial dynamics.

Big Ben has erupted several times over the past two decades. McDonald Island lies 43.5 kilometres due west of Heard Island, and is the major island in the McDonald Islands group. It is a mere 186 metres high and it too has an active volcano. The McDonald Islands are so volcanically active they have doubled in area since 1980.

always resorted in using a generator to charge the inverter until I decided I must go solar because of my fridge. NOTE: My fridge is LG inverter fridge, and it's just 60 watts. I called the inverter guy & we did a calculation of 4 brand new solar panels (250 watts each) because the inverter can only take 1000 watts)
