Higee will gradually lay out a full industrial chain covering battery raw material, cell, module, battery system, energy storage system, communication backup power supply and other fields, making efforts to become a leader providing comprehensive solutions in the new energy field.

Higee's 314Ah energy storage cells have recently commenced sample deliveries and are scheduled for full-scale mass production and delivery by the end of 2023, marking the official launch of the era of 300Ah+ large cells. We eagerly await Higee New Energy's future endeavors in delivering more energy storage technology solutions, propelling us ...

im building a battery pack for a solar golf cart conversion and Docan has both 105ah eve or 120ah Higee cells that im considering... any advice on which to go with? will the 120ah cells be more forgiving when under high current draw conditions? This 36v pack might see amp current loads around 250-300 amps for short period of time.
