

Household declaration of solar power generation

Can a third party install solar panels on a property?

The most common arrangement is that the third party installs solar PV panels on the property. The homeowner then receives the electricity generated (lowering their electricity bills) and the third party owner of the installation receives any associated subsidies, in this instance, FIT generation and export payments.

Can a person own a solar PV installation?

While an individual can own the solar PV panels installed at their property, there are instances where the owner of an installation may be different from the owner of the property or site at which the installation is located.

How are solar PV & wind installations made?

are made through one of two routes: Owners of solar PV or wind installations with a DNC of 50kW or less, or micro-CHP, need to use Microgeneration Certification Scheme (MCS)-certified equipment installed by an MCS-c

Can I get a solar PV grant if I don't have solar panels?

If you don't have solar panels already, you can apply for a solar PV grant to help with the cost of getting them. You must tell ESB Networks that you plan to install solar panels. You can do this by completing a NC6 form (pdf) or a NC7 form (pdf), depending on the size of your microgeneration system.

What documentation should I provide to the energy device owner?

Installers should provide the following documentation to the energy device owner: Building Regulations Completion Certificate from the installation contractor for notifiable work. This certificate should be provided upon selling the property. Read more information on the use of a Building Regulations Completion Certificate

What is considered a stand-alone solar PV installation?

Installations with a TIC of 250kW or less. A solar PV installation with a TIC of 250kW or less will be classified as stand-alone if it is not wired to provide electricity to a building. If it is wired to provide electricity to a building,
