What is needed to install solar panels on UK homes?

Here's a quick guide to what's needed to install solar panels on UK homes: An installer should visit to determine if the property is suitable for solar panels. They will look at the size and orientation of the roof to decide the best location and angle for installing panels.

Do I need planning permission to install solar panels on my roof?

When considering the installation of solar panels on your roof, it's critical to understand if you need permission. In the UK, solar panel installations often fall under "Permitted Development," meaning you typically won't need planning permission.

Do you need a survey to install a solar panel?

So first, a professional surveyor will check your roof and rafters to ensure that a solar panel installation can go ahead safely. The results of the survey may affect the price quoted by your solar panel providers. With that done, the installation can begin.

What is a DIY solar panel installation?

DIY installations allow you to customise your solar panel system to match your home's energy needs and roof layout(or perhaps even a balcony). Some professional installations may offer limited options,while a DIY approach allows for optimising panel placement,choosing specific components,and tailoring the system for maximum efficiency.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.
